

Go!Zilla 5.03

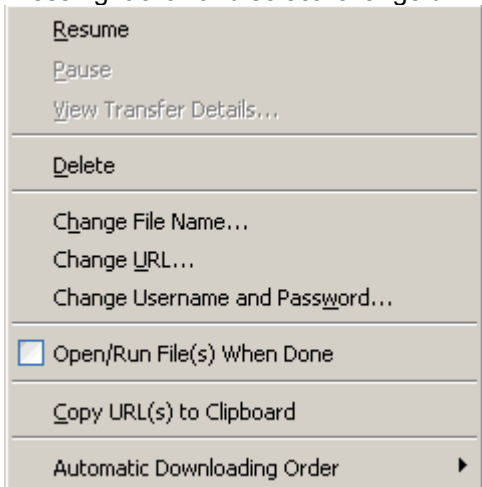

When your download disconnected and your session has timed out and you would like to continue downloading the file, do the following.

Log in to the site using your username and password, when you are in the members area, open up Go!Zilla, browse the file you would like to continue to download.

For example
v47025-301.wmv

Press right click and select "change url" in the pop-up menu.

In the editbox you will see something like this

<http://l3.at.video.member.mightymistress.com/index.php/10/47025/v47025-301.wmv?SID=121986477556562>

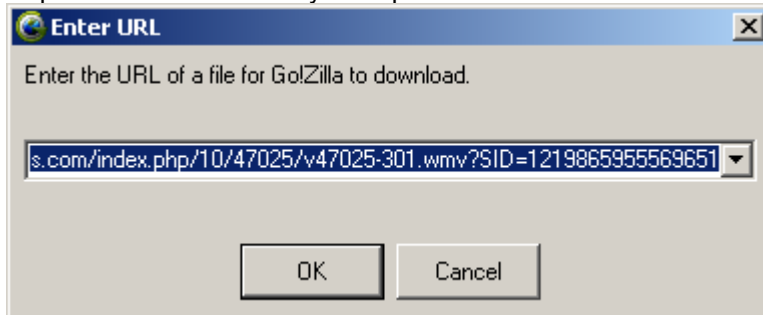

Go back to your browser and look into the addressbar. you will see something like this

<http://mightymistress.com/members/?SID=1219865955569651>

Copy the number you after SID= (1219865955569651) to the clipboard.

Go back to Go!Zilla, search the number after the SID= in editbox.
Replace it with the one in your clipboard.

Press Ok.

Press resume on the file to continue downloading.
